github.com/aamirabbasii201

PROFILE

- BSCS graduate with industry and project experience in mobile, web, and desktop application development.
- Skilled in React Native, React.js, JavaScript, ASP.NET Web API, C#, SQL Server, SQLite, Firebase, REST APIs, and third-party integrations.
- Experienced in AI-powered apps, database design, local data persistence, debugging, and maintainable software development.

SUMMARY OF EXPERIENCE

- 5 months' combined industry experience: 3 months at CloudGate Technologies and a 2-month remote internship at Safex Solutions.
- Built mobile, web, and desktop apps with React Native, React.js, ASP.NET Web API, C#, Windows Forms, HTML, CSS, JavaScript, and SQL Server.
- Integrated AI APIs, Pexels, Open-Meteo, and Firebase; designed mobile UI/UX screens and prototypes in Figma.

PROFESSIONAL EXPERIENCE

CLOUDGATE TECHNOLOGIES — SOFTWARE DEVELOPER

Rawalpindi, Pakistan — 3 Months

Project: Software Development **Client:** CloudGate Technologies
Role(s): Software Developer **Technologies:** React Native, JavaScript, APIs
Responsibilities:

- Supported application development, debugging, testing, and problem-solving while applying professional software development practices.

SAFEX SOLUTIONS — SOFTWARE DEVELOPMENT INTERN

Remote — 2 Months

Project: Remote Software Development Internship **Client:** Safex Solutions
Role(s): Software Development Intern **Technologies:** Software Development, Debugging
Responsibilities:

- Contributed to development tasks and application improvements while strengthening programming, problem-solving, collaboration, and remote communication skills.

PROJECTS

Project: PlantCareAI – AI Plant Identification & Care App **Client:** Personal Project, 2026
Role(s): Full-Stack Developer **Technologies:** React Native, JavaScript, AI APIs, SQLite, OP-SQLite, AsyncStorage, REST APIs
Responsibilities:

- Built an AI-powered app for plant identification and health diagnosis using image analysis.
- Integrated AI services, Pexels for plant images, and Open-Meteo for weather; added location-based plant recommendations with manual location selection.
- Developed My Garden with SQLite/OP-SQLite for adding, viewing, deleting, and storing plants and their images.

Project: PrimeCab Solutions – Business Website **Client:** Personal / Client Project, 2026
Role(s): Web Developer **Technologies:** React.js, JavaScript, Firebase, HTML, CSS
Responsibilities:

- Developed a responsive business website using React.js, reusable components, and mobile-friendly layouts.
- Integrated Firebase for website functionality and data handling; improved styling and layout across screen sizes.

Project: E-Learning Mobile Application **Client:** PMAS Arid Agriculture University, 2025–2026
Role(s): Full-Stack Developer **Technologies:** React Native, ASP.NET Web API, SQL Server
Responsibilities:

- Built the mobile app and backend API; designed the course, quiz, and progress database and implemented authentication, quizzes, video learning, and student progress tracking.

Project: Hotel Management System
Client: University Project, 2025
Role(s): Desktop Application Developer
Technologies: C#, Windows Forms, SQL Server
Responsibilities:

- Developed booking, billing, and customer record features and designed the relational database for hotel operations.

Project: Car Rental Management System
Client: University Project, 2024
Role(s): Web Developer
Technologies: HTML, CSS, JavaScript, SQL Server
Responsibilities:

- Built a responsive frontend and connected it to SQL Server for rental data management.

Project: Smart Home Safety System
Client: Digital Logic Design Project, 2023
Role(s): Hardware Simulation Developer
Technologies: Logic Gates, Circuit Design
Responsibilities:

- Designed and simulated logic for fire, smoke, and intrusion detection in a digital home safety system.

TECHNICAL SKILLS

- **Mobile:** React Native, Android, JavaScript, SQLite, OP-SQLite, AsyncStorage
- **Frontend:** React.js, HTML5, CSS3, responsive web design
- **Backend:** ASP.NET Web API, .NET, REST APIs, API integration
- **Languages:** JavaScript, C#, C++
- **Databases:** SQL Server, SQLite, SQL, relational database design
- **AI / Cloud / APIs:** AI API integration, image analysis, plant identification and diagnosis, Firebase, JSON, Pexels, Open-Meteo
- **Tools / Practices:** Git, GitHub, Figma, OOP, software architecture, debugging, problem-solving, SDLC

EDUCATION

BACHELOR OF SCIENCE IN COMPUTER SCIENCE (BSCS)
PMAS Arid Agriculture University
2022–2026

EXTRACURRICULAR ACTIVITIES

- Participated in university-level cricket tournaments and departmental badminton events.
- Participated in coding practice, peer programming, technical discussions, and collaborative project development.
